

Quality and Continuous Improvement Policy

Teledyne Marine, in Daytona Beach and Orlando, Florida, is committed to providing products of the highest quality and reliability, while doing so safely and with the highest level of integrity. We continually review and improve the effectiveness of our Quality Management System through data-driven enhancements to our products and processes, while simultaneously ensuring conformance to customer requirements, legal requirements, and the ISO 9001 standard. We strive to provide superior customer satisfaction and product quality by engaging and empowering our entire stakeholder community - from supply chain to workforce to customers.
