

Release Notes

BlueViewer Version 3.0.2

10-23-2015

Overview

BlueViewer version 3.0.2 gives the ability to use either a 32 bit version or a 64 bit version. The advantage in using the 64 bit version is that more system memory can be used to work with multiple large datasets.

List of Updates and Changes

Create 64 bit and 32 bit versions of the BlueViewer application	Complete
Increase the compatibility of the BlueViewer application for the current used computer and laptop video cards.	Complete
